Experience

NYC Office of Technology & Innovation

New York, NY

Design Lead, 2022 – Present

Founding designer in the City government's digital strategy team, which creates and implements policies and tools to improve digital government UX for over 8.5M+ New York City residents. Launched 3 major products:

■ NYC Digital Design System, 2025–Present

- Led the design of NYC government's first design system with the goal of serving 100+ agencies
- Designed and tested component library to be fully accessible with WCAG 2.2 AA. Collaborated with content team to write and set guidelines for color, layout, and typography for all of NYC digital.
- Currently leading design engagements with the largest and highest-impact government agencies to drive adoption and implementation.

■ nyc.gov Redesign, 2023–2025

- Redesigned nyc.gov in 2025, the city government's main site with 8.5+ million user reach and 1 million unique monthly users, leading to 15 point increase in customer satisfaction in 3 months.
- Managed 2 full-time contractors and 3 interns throughout the full project.
- Designed with NYC Digital Design System, decreasing average site accessibility errors from 32 to 0.
- Redesigned services to decrease 311 call center calls by 49% for parking tickets; 32% for rent increase help

■ Digital bus time signs, 2025–2026

- Led the digital and hardware design of new digital signage for bus arrival times to be installed in 15,000+ bus stops
- Collaborated directly with leadership in the NYC Department of Transportation and JCDecaux

Deloitte Digital

New York, NY

Design consultant, 2019–2022

Created and tested designs, orchestrated service blueprints, and developed product roadmaps to launch products and services on 7 projects for clients from Fortune 100 companies. Launched 4 end-to-end enterprise services as a Lead Designer:

■ Vanguard

- Designed the UX flow of a new retirement planning product within the Retirement Plan Participants offering for 7.5 – 10 million investors.
- Led user research and synthesis; findings informed the design of a new, market-differentiating feature to provide moment-specific educational and emotional support for hesitant or new investors in their end-to-end journey.

■ Anthem

- Digitized and designed the Medicare Advantage onboarding process for 1.2+ million members.
- Planned, executed, and led user research sessions with 13 Anthem members by testing design prototypes. Created final designs using Anthem's Design System.
- Designed an internal platform for the CMO to organize and orchestrate 3000+ annual member communications.

■ Consumer Reports

- Designed a new product comparison feature to drive user click-through to additional CR review articles and purchase links
- Increased member traffic rate to review pages by 136%.
